

LIBERATOR® TACTICAL LIGHT

www.first-light-usa.com

HANDS-ENABLING. Using a Liberator® Tactical Light means being able to do all the things you need to do – shooting, gun handling, control tactics, handcuffing – without having to sacrifice the usefulness of your hands.

TRULY TACTICAL. Most “tactical flashlights” are based on the same design that’s been around for over a century. These traditional flashlights continue to be made smaller and brighter, but every one of them comes with the same big limitation– you have to hold it in your hand to use it.

BUILT FOR PERFORMANCE. The Liberator® Tactical Light was started with a blank sheet of paper and created from the ground up, with the intuitive operation, superior ergonomics and the increased safety of the tactical professional in mind. The result is an intuitive lighting tool that works “with you,” not “against you” – Liberator® is built to fit you first.

Provides for a Solid Two-Handed Grip

Faster Manipulations

ON THE HAND, NOT IN IT. Because the Liberator® Tactical Light leaves both hands free, it allows you to do all the things you’d do with a standard flashlight, without having to “give up” a hand to hold the light. You get the best of both worlds – full use of both hands and maximized use of your light. Load/Fire/Reload/Clear, all in the same manner you would in broad daylight. No more armpit or mouth holds, dropped lights or slow and awkward manipulations.

Safe-Search™ with Carbine

SAFE-SEARCH™. The Liberator® Tactical Light is also a safer alternative to weapon-mounted lights for both handguns and long guns. While a weaponlight is a sound choice for specific, extremely tactical situations, it’s also limited by the necessity of having to point your weapon to gain illumination. The Liberator® Tactical Light gives you the benefit of joining your light and weapon when it’s necessary – and full separation of light and gun once the threat has passed.

Superior K9 Application

MOLLE-Ready

Ideal for I.D. Checks

Safe-Search™ with Pistol

- GRASPING/HOLDING OBJECTS AND EQUIPMENT
- CLIMBING
- HANDLING/SUBDUING SUBJECTS
- LOADING/RELOADING FIREARMS
- CLEARING WEAPON MALFUNCTIONS
- HOLDING A CANINE LEASH
- PATROLLING ON BICYCLE OR HORSEBACK

PROVEN BY TACTICAL PROFESSIONALS. Testing at a major university police training institute showed the following improvements* over traditional flashlight techniques among shooters with only 15 minutes of orientation.

+23%
IMPROVED MARKSMANSHIP

2.12 SECONDS
FASTER TACTICAL LOAD TIME

19% vs. 5%
FLASHLIGHT VS. LIBERATOR®
DAYTIME TO NIGHTTIME
ACCURACY LOSS

1.45 SECONDS
FASTER FAILURE TO FIRE/
IMMEDIATE ACTION DRILL TIME

* Versus traditional cylindrical flashlights using industry-accepted shooting techniques.

THE LIBERATOR® TACTICAL LIGHT. ALWAYS ON HAND.

Developed for tactical professionals, the Liberator® Tactical Light is designed to follow the movements of your hand, making it an intuitive, easy-to-use lighting tool that's available at a moment's notice.

Whether firing a handgun or long gun, performing control tactics, or just going about everyday tasks, The Liberator® Tactical Light is always on hand.

AVAILABLE MODELS
